

## **Curriculum of intent - Computing**

### **Intent**

Here at St. Winefride's Primary School, we aim to prepare our learners for their future by giving them the opportunities to gain knowledge and develop skills that will equip them for an ever-changing digital world. Knowledge and understanding of ICT is of increasing importance for children's future both at home and for employment. Our Computing curriculum focuses on a progression of skills in digital literacy, computer science, information technology and online safety to ensure that children become competent in safely using, as well as understanding, technology. These strands are revisited repeatedly through a range of themes during children's time in school to ensure the learning is embedded and skills are successfully developed. Our intention is that Computing also supports children's creativity and cross-curricular learning to engage children and enrich their experiences in school. The computing curriculum at St Winefride's Catholic Primary School aims to deliver a fun, engaging and valuable take on many of the technological aspects that are spread throughout our daily lives. Due to the constant shifting of technology, the skills that are being taught are always changing and developing. At St Winefride's, computing is a practical subject, in which invention and showing initiative are encouraged.
